0.1 *Data + Ida Bell Wells-Barnett*

- We use “Data Wells” to describe the planning, input, and storage of historical data.
 - We begin our analysis with Ida B. Wells-Barnett’s development of a lynching database.
 - We describe other “Data Wells” on race and U.S. state violence via quantitative history.
- ...

1.1 Quantitative history

- Quantitative history considers methods in the quantification of historical information.
- Historians like Pierre Chanu, author of the text to the right, are often centered but highlight more conservative historical narratives¹.
- Despite long-standing critiques, fewer historical narratives focus on the computational and data aspects of critical histories.
